Entry Description (max 500 words)

cleo metal – Archirivolto design

This series, designed like a domestic architecture, is marked by an outer shell and a modern swivel cross base in metal. The comfortable upholstered shell gives relaxation from the hectic of daily routine and allows recharging the batteries.

Archirivolto was founded in 1983 by Claudio Dondoli and Marco Pocci as an industrial planning, design and architecture studio.

While studying Architecture in Florence, Claudio and Marco started an experimental theatre group together with some friends. When they decided to focus their joint efforts on design, their interest in theatre strongly influenced the set-up of their new studio: creativity, sense of reality, respect and attention for the public. For Pocci+Dondoli design is beauty, harmony and freedom and cannot be bound by strict, pre-established rules, nor can it be the privilege of a social or cultural elite.

One of the studio's principles is the research on materials and processing to achieve the best value for money. Preferred materials such as aluminium, plastic and leather gain nobility and elegance through sophisticated processing.

During the last years the studio has received more and more requests from international clients who appreciate the professionalism of the team and the quality of the products.

At the same time, Pocci+Dondoli have been leading the reconstruction of a Tuscan hamlet where they

have started a fine wine production.
